Job Purpose

The Offshore Refrigeration Engineer will be responsible for the installation, maintenance and servicing of air conditioning and refrigeration equipment on offshore mobile and fixed installations, as well as onshore locations when required.

Core Responsibilities

This job profile has been designed to indicate the general nature and level of work performed by employees within this classification. It is not designed to contain or be interpreted as a comprehensive inventory of all responsibilities, qualifications and competencies required of employees assigned to the role.

- Installation of air conditioning, refrigeration pipework and refrigeration equipment.
- Pressure testing and brazing.
- Commissioning and servicing of HVAC & refrigeration equipment.
- Refrigerant recovery.
- Refrigeration pipework brazing, bending, setting and joining.
- Leak testing, evacuation and charging of systems.
- Working on water chillers and air handling units.
- To complete all activities as identified within the work packs.
- Excellent customer service and client liaison skills and responding to customer care issues in a pro-active manner.
- Assist in the development of the current and future network of customers.
- Identifying new product or service opportunities.
- Provide reports in a timely manner, ensuring that records are completed and comprehensive.

HSEQ Responsibilities

- By adhering to Nucore Group's HSEQ policies and procedures, ensure safe working practices are followed at all times.
- Report any unsafe conditions, behaviours or acts to management, or by using the Nucore Group observation card system.
- On request, actively participate in HSEQ audits and inspections.
- Complete mandatory HSEQ training as identified on the Nucore Group training matrix.
- Continually practice good housekeeping standards.
- Ensure all waste handled is disposed of in a suitable manner.

- Where required, adhere to the controls described in risk assessments, safe systems of work and COSHH assessments, and highlight any shortcomings in the existing controls.
