

Integrated Solutions Provider for the **PRIVATE & PUBLIC SECTOR**

Our lifecycle services cover initial design through to installation and maintenance of Fire Protection, Security, Cooling Systems (HVAC), Safety Equipment and Certified Doors, offering clients reliable and cost-effective solutions.

FIRE PROTECTION: Design, install and maintain fire protection systems to detect and suppress outbreaks of fire.

SECURITY: Range of security protection measures, including CCTV and access control, intruder systems and systems design.

SAFETY EQUIPMENT: A range of safety products tailored to the specific needs of clients including fire alarms, fire extinguishers, sprinklers and suppression systems.

COOLING SYSTEMS (HVAC): We have over 20 years track record in the design and manufacture and installation of climate control and HVAC systems and equipment.

CERTIFIED DOORS: We supply, install, maintain and repair fire doors, blast doors and hatches (from A to H rated).

DELIVERING VALUE THROUGH EFFICIENCY

- Multi-Services Provider
- Single Point Contact, Single Invoice
- Reduces Administration
- Reduces Mobilisations
- Proven Track Record

Case Study

Services to Local Authority

The Waste and Recycling Services department of the Local Authority had a requirement to install a solution that provided restricted and pre booked entry to all 12 of their Waste and Recycling sites.

Nucore designed and installed an ANPR (Automatic Number Plate Recognition) camera system and integrated automatic barrier installation which had connectivity and full integration with the Council's 3rd Party Online Booking system.

The entire project was completed, safely and within the timescale.
